#### ***Allowable Subject Matter***

More specifically, the teachings of the references taken as a whole do not show or render obvious the combination set forth, including an elastic support member that lifts up and supports, with an elastic force of an elastic member, a stack of sheets stacked on a sheet tray; and a restraining mechanism that restrains the elastic support member in

accordance with the stacking amount of the sheets so that the position of the uppermost sheet of the stack of sheets stacked on the sheet tray is held at a substantially constant position/height, in which (1) the restraining mechanism includes an engagement member that moves together with the elastic support member and a restraining member that restrains the movement of the engagement member; and (2) the restraining member moves along a straight locus at least in the vicinity of an engaging portion between the engagement member and the restraining member so as to engage with and disengage from the engagement member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
